

Personal support in all matters relating to patent issues and technical solutions. We offer you concrete solutions for your development and help you with the registration of inventions.

TIPAG - Patent Experts

Our many years of experience in the field of patent licensing enable us to provide efficient and reliable analysis for quality assurance in patent matters.

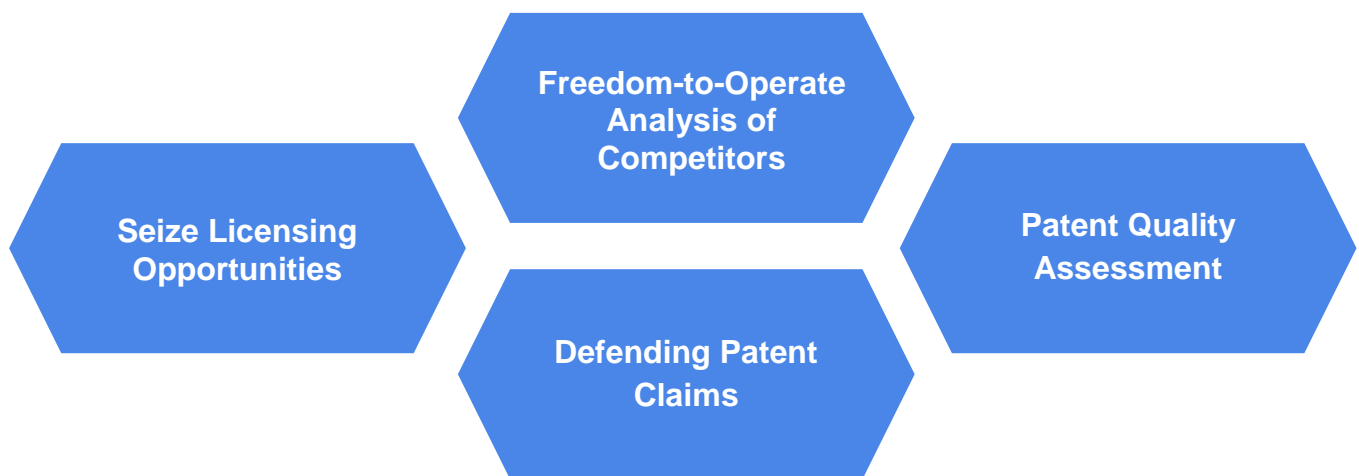

We support you in **applying inventions** during development and guide you through the registration process.

We free your development with regard to existing competitor solutions by means of a **freedom-to-operate** analysis. We show your development what you should pay attention to during implementation - to prevent future patent lawsuits.

If you are notified of **patent infringements** by a competitor, we will examine the claims for you and **defend** you against the plaintiff.

Do you already have some patents in your portfolio and would like to know more about the **quality of your IP**? We will examine your patents, prepare an **assessment** and evaluate your options for asserting these property rights.

We help you get the most value from your development by identifying **licensing opportunities**.

We offer you a tailor-made solution for your company so that you can concentrate on your core business with peace of mind. We look forward to hearing from you without obligation. We are available for an initial consultation at any time. Contact us: www.tipag.ch
