

Personal support in all matters relating to patent issues and technical solutions. We show you concrete solutions for your development and help you with the registration of inventions.

TIPAG - Patent Engineers

We support you in **applying inventions** right from the development stage and guide you through the complete procedure.

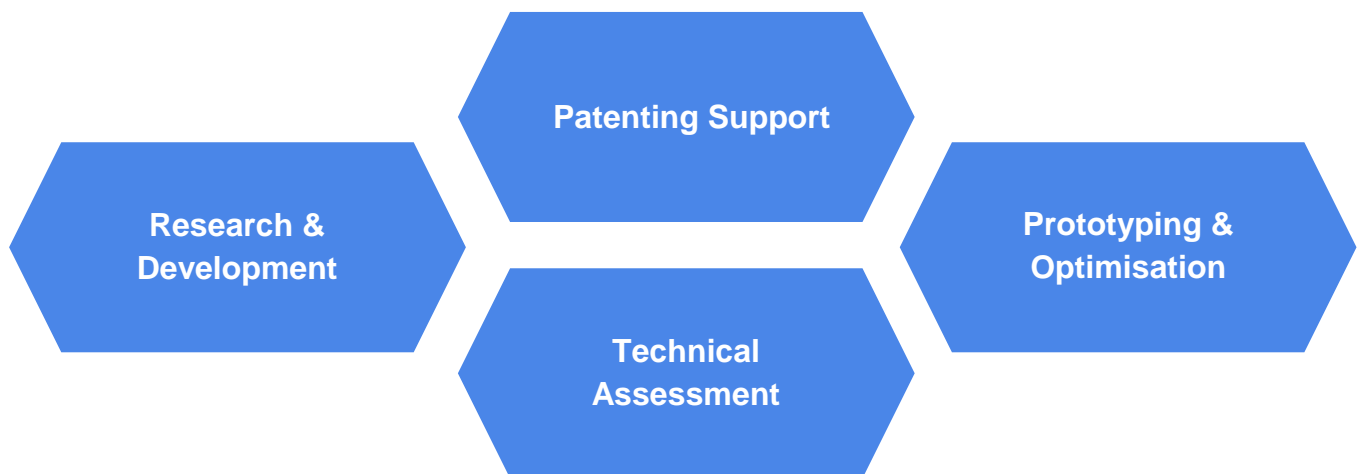

We take on your **research and development** work and show you possible solutions for implementations. We operate and test your **prototypes** and contribute our many years of experience.

We free your developments with regard to existing competitor solutions by means of a **freedom-to-operate** analysis. We show you what you should pay attention to during implementation - to prevent future patent lawsuits.

Our wide-ranging experience in the optimization of solutions from research, for example in the areas of **energy supplies, protection mechanisms and e-mobility**, make us your reliable and flexible partner.

Do you already have some patents in your portfolio and would like to know more about the **quality of your IP**? We will check your patents and prepare an **assessment** for you.

We support you in getting the most value from your development by identifying **licensing opportunities**.

We offer you a tailor-made solution for your company so that you can concentrate on your core business with peace of mind. We look forward to hearing from you without obligation. We are always available for an initial consultation: www.tipag.ch
